St. Vincent IPA understands that you have a busy practice; in an effort to help you with providing the best care to your St. Vincent IPA members, we have established a diabetic clinic to help your members manage their diabetes.

In addition to providing routine diabetic services and education, our Nurse Practitioners are able to personally work with your patients to keep their diabetes under control, as well as assist with obesity and pre-diabetes.

We encourage you to take advantage of these services by submitting a referral request. Progress reports on your members will be provided to you regularly. These services are meant to supplement, not replace your efforts.

Our Diabetic Nurse Educators will assist your patients with the following:

- Diabetic Exams/Check-ups
- Blood Sugar/Cholesterol Monitoring
- Diabetic Foot Exams
- Nutritional Counseling
- Review of Medications
- Education on Exercise
- Pre-Diabetes
