## Benefits

- ◇ Helps patients who are not physically able to seek routine care from their PCP
- ◇ Added support to PCPs with complex homebound patients
- ◇ Reduces hospital admissions and re-admissions
- ◇ Unlimited follow-up visits to patient as needed to ensure their health and well being

## Criteria

- ◇ Because of illness or injury, need the aid of a supportive device such as, a cane, crutches, wheelchairs and walkers, the use of special transportation, or the assistance of another person to leave their place of residence or having a condition such that leaving his or her home is medically contraindicated
- ◇ There must exist a normal inability to leave a home and leaving home must require a considerable and taxing effort
